

Hosting Linux

Professional Hosting package

A business package suitable for most linux based websites. Robust and reliable, this package offers all your website needs for a leading presence on the web. Boosted Disk quotas and Bandwidth so you don't have to worry about capacity. 2020Media runs a fully redundant network powered by Cisco. Our servers are distributed over several locations to give you the most reliable service possible. This plan can be easily upgraded in the future

Offer Add Java Tomcat hosting on this plan for £225+vat/year
